EDUCATION

Ph.D., Economics, Boston University 2021–Expected 2027
Fields: Macroeconomics and Data Science

M.A., Economics, Boston University 2017–2018

B.A., Economics, Universidad Nacional Mayor de San Marcos, Peru 2009–2013

PROFESSIONAL EXPERIENCE

Lead Supervisor, Division of Economic Analysis, Central Bank of Peru Sep 2026– Present

- Geospatial and economic analysis of the heterogeneous effects of climate shocks on Aggregate Economic Outcomes using Input–Output Tables.

Econ Internship, Amazon Worldwide Installments, Amazon Jun 2026–August 2026

- Evaluate and forecast default rates for Amazon installment products, identifying how macroeconomic conditions affect customer repayment behavior and portfolio credit risk.
- Develop analytical frameworks, projections, and research projects to identify the main drivers of default performance and support data-driven product and business decisions.

Head, Division of Economic Activity Indicators, Central Bank of Peru Sep 2019–Aug 2021

- Led a team responsible for producing high-frequency economic indicators and nowcasting GDP to support monetary policy decisions.
- Designed and implemented data-driven forecasting models integrating multiple real-time data sources.
- Coordinated with public- and private-sector stakeholders to gather intelligence and improve sectoral projections.
- Delivered actionable insights to senior policymakers, enhancing decision-making under uncertainty.

Senior Analyst, Division of Macroeconomic Modeling, Central Bank of Peru Aug 2018–Aug 2019

- Developed and estimated semi-structural and DSGE models using Bayesian methods for macroeconomic policy analysis.
- Conducted scenario analysis, impulse response evaluation, and historical decompositions to assess economic shocks.
- Built forecasting tools for inflation and macroeconomic variables using time-series and multivariate models.

Analyst, Division of Economic Activity Indicators, Central Bank of Peru May 2014–Jul 2017

- Led the GDP rebasing project using 2007 as the base year, improving national accounts measurement and data consistency.
- Produced and analyzed high-frequency macroeconomic indicators used in policy reports and decision-making.

SKILLS

Programming: Python, SQL, R, MATLAB, Stata, EViews, Visual Basic
Cloud & Data: AWS (SageMaker, S3, Glue, EventBridge, Lambda), Parquet, data pipelines, API integration
Macroeconometrics: Time-Series Econometrics, Macroeconomic Forecasting and Nowcasting, Bayesian State-Space Models, Credit-Risk Modeling
Modeling: DSGE Models, Scenario Analysis, Policy Simulation, Risk Assessment, IRF Analysis.

RESEARCH

Publications

- Real Dollarization and Monetary Policy in Peru. *Revista de Estudios Económicos*, 2017.
(with Contreras, A., Quispe, Z., and Regalado, F.)

Working Papers

- Identifying Peru's Business Cycles: A Bayesian Approach
(with Florian, D.)
- Linking Historical GDP Series by the Expenditure Approach and by Economic Sectors, 2007 Base
(with Gutiérrez, J., Quineche, R., and Virreira, C.)
- Breaking (Down) News: Using News Data for Economic Forecasting in Peru.
(with Palacios, G., and Saldarriaga, M.)

Work in Progress

- Cost Exposure and Currency Choice: Theory and Evidence from Firm-Level Data in Peru.
(**Job Market Paper**)
- The Heterogeneous Impact of the El Niño Phenomenon.
- Dynamic Labor Supply.

TEACHING EXPERIENCE

Teaching Assistant, Boston University

- Introductory Macroeconomic Analysis (2024, Spring 2025); Macroeconomic Theory (Fall 2025, Spring 2026).

Teaching Assistant, Universidad Nacional Mayor de San Marcos, Peru

- Macroeconomics III (2015–2017); Econometrics I (2013); Advanced Macroeconomics (2012–2014).

ADDITIONAL INFORMATION

- **Languages:** Spanish (native), English (fluent).
- **Citizenship:** Peruvian.
